

AJITH KUMAR

Full-Stack Java Developer (Spring Boot | Angular | PostgreSQL)

Chennai, India | 9047478912 | 12ajith1998@gmail.com

PROFESSIONAL SUMMARY

Full-stack Java developer with 4+ years of experience architecting and delivering enterprise web applications using Spring Boot, Spring Framework, and PostgreSQL. Proven track record leading cross-functional teams of 10+, owning services end-to-end from design through production support, and optimizing system performance at scale. Strong collaborator in Agile environments with hands-on experience across REST API design, database engineering, and DevOps tooling.

KEY ACHIEVEMENTS

- **Architected a mission-critical microservice** managing the full loan lifecycle for a multi-sector lending platform, now supporting Microfinance, Mortgage, Vehicle, and Personal Loan products in production.
- **Led a 10+ engineer team** as technical owner, improving delivery predictability and code quality through structured reviews and sprint governance.
- **Cut database load** on high-volume transactional workflows by introducing Redis caching and PostgreSQL query/index optimization.
- **Delivered a zero-data-loss migration** of ~4TB of production data from xDB to MarkLogic, including full reconciliation and audit tracking.

CORE SKILLS

Languages & Frameworks: Java, Spring, Spring Boot, Spring Data JPA, Hibernate, Python

Web Technologies: HTML, CSS, JavaScript, jQuery, Angular (basics), Apache Wicket

Databases: PostgreSQL, MySQL, H2DB, Redis

Tools & DevOps: Git, GitHub, Bitbucket, Maven, Jenkins, SonarLint, IntelliJ, Eclipse, VS Code

Practices: REST API Design, Agile/Scrum, System Design, Team Leadership, Production Support

PROFESSIONAL EXPERIENCE

CLM — Co-Lending Management Platform (nPOS)

2 Years

- **Architected and owned** an independent microservice covering the complete loan lifecycle — sanction through collection — for a multi-sector lending platform spanning microfinance, mortgage, vehicle, and personal loans.
- **Led and mentored** a cross-functional team of 10+ engineers, driving delivery timelines, code quality, and technical direction.
- Designed and built backend modules with **Spring Framework and Spring Data JPA** supporting loan origination, underwriting, disbursement, and reconciliation workflows.
- Implemented **RESTful APIs** integrating banks, financial institutions, and originators for seamless cross-platform data exchange.

- Optimized **PostgreSQL** performance through query tuning, indexing, and **Redis caching**, reducing database load on high-volume transactional data.
- Managed schema migrations with **Python Alembic** across environments; enforced code quality via SonarLint in an Agile/Scrum workflow.

Temenos — EQUIFAX InstaTouch ID Integration

11 Months

- Built a configurable, non-intrusive identity-verification service (MEAN stack) enabling businesses to authenticate consumer identity in real time.
- Deployed and supported the middleware application across QA, UAT, and PROD environments.
- Partnered with system engineers on design reviews and implementation planning; provided daily technical guidance on bugs and enhancements.

XDB to MarkLogic Migration (ZIO ETL)

6 Months

- Developed connectors and pipelines to migrate ~4TB of XML/blob data from xDB to MarkLogic with zero data loss, full reconciliation, and audit tracking.
- Owned end-to-end delivery — requirements analysis, design, coding, and testing — across front-end and back-end components.
- Authored design documents, unit test cases, and use-case documentation; resolved client-reported defects.

Eco Online — Field iD Asset Management

12 Months

- Maintained and enhanced a cloud-based safety-asset inspection platform built on **Spring Framework**, **Spring Data JPA**, **Hibernate**, and Apache Wicket.
- Owned end-to-end production support, fixing bugs and coordinating releases with product owners and customer success stakeholders.
- Analyzed requirements and delivered design, development, and unit testing for product enhancements.

CERTIFICATIONS

- Digital Transformation Program — Java Enterprise Apps with DevOps, NIIT
- Spring Boot 3: Spring 6, Core, REST, MVC, Security, Thymeleaf, JPA, Hibernate, MySQL — Udemy
- ChatGPT and Generative AI — Udemy

EDUCATION

Bachelor of Technology in Information Technology
